Subject: Notification: Dedman Demolition and New Road Opening
Date: Tuesday, 5 February 2019 2:48:15 PM
Importance: High

Dear all,

Dedman Demolition. We have just been advised that internal demolition preparations for the John Dedman building have commenced and the building will be brought down over the next few days. Removal of debris from site will occur next week. There will be some noise and vibration throughout this period. Please keep windows closed to reduce the amount of dust entering the building.

New Road Opening. The extended portion of Kingsley Street leading into Kambri has opened to pedestrian and vehicle traffic and students have begun moving into accommodation. Construction works on the remainder of the Kambri site continue. This road feeds the new Kambri short stay parking station and we anticipate the traffic flow will increase significantly over the next few weeks. New pedestrian crossings and road signage will be in place soon. In the meantime, please exercise extra caution when crossing roads in the CBE precinct and report any traffic safety incidents via whs.cbe@anu.edu.au and Figtree.

Best regards,

CBE WHS team
